

Residential Product Line

Quality People. Quality Products.

We value our customers and manufacture our garage doors with the highest quality workmanship and raw materials.

Our method is simple. We hire quality people driven to produce quality products. We don't just say it - we do it. Together, we find innovative ways to solve problems and continuously improve while working smarter and safer. Our people take pride in their work and strive to provide the highest quality of product and service day in and day out. That's the Haas Door Difference.

As you read forward, allow us to open a door to endless possibilities for you!

American Tradition™ 9000 series

9252 in american walnut with american walnut overlays, arch 8-pane windows

Door Design Options

Most designs are available with plain or arch top sections.

Most designs are available inverted.

Available in flush or v-groove base panels.

Available in single or double door designs.

All models shown are available with multiple style options: 9200, 9200a & 9600 models, flush or v-groove base panel option, and single or double door designs. Most models are available with plain or arch top sections. Some designs can be inverted to match other features on the home. See the best option directly on your home by using our online visualizer at haascreate.com.

9200 & 9200a

9600

A Full Thermal Break is used in the tongue-and-groove construction of all 9000 series doors. This rigid vinyl extrusion seals the joints and eliminates metal-to-metal contact, which limits the transfer of temperature.

9200 & 9200a series doors include Air Infiltration Seals, which exceed the ASHRAE 90.1 Standard when installed with standard bottom seal and commonly available rigid/flexible vinyl door stop.

9262 in english oak with carbon black overlays, v-groove base panel

Enjoy the handcrafted quality and rich traditional carriage house style without the maintenance of wood. The American Tradition™ 9000 Series doors contain environmentally compliant polyurethane insulation with a 0.081, 0.110 or 0.096 tested U-Factor. They are available in twelve solid and five wood grain colors, with an option to mix and match any combination. *(examples: almond boards on a sandstone door or carbon black boards on an american walnut door)*

Solid Base & Overlay Colors

Polar White Δ

Almond

Sahara Tan

Sandstone Δ

Trinar® Beige

Bronze*

Trinar® Brown*

Espresso*

Brown*

Gray

Charcoal*

Carbon Black* Δ

9609 in espresso with espresso overlays

9620 in graywood with 3-pane windows

9202a in polar white with polar white overlays, 6-pane windows

9631 in almond with single arch 6-pane windows

Wood Grain Base & Overlay Colors

Mahogany

Ash

American Walnut

English Oak

Graywood

Color Notes: Wood grain overlays are handcrafted and can vary slightly in color like real wood.

Trinar® colors on steel sections carry a 35-year finish warranty. Trinar® overlay colors are color matched to the steel sections but do not contain the Trinar® additive, therefore fall under standard 5 year overlay warranty.

*These colors include a cool chemistry paint finish on the base door and are not recommended for projects with extreme exposures to heat and sunlight.

Δ Base color options available for aluminum 9200a models.

Due to the printing process, colors may vary. For an accurate color match, contact your Haas Door dealer.

SlimLine

710, 712, 5710, 5712
7/8" Insulated Tempered
Outer frame available in Black or painted to match the door color. Impact option, Black only. White inside frame.

610, 612, 2010, 2012, 5210, 5212
1/2" Insulated Tempered
Outer frame available in Black or painted to match the door color. Impact option, Black only. White inside frame.

TL Series

TL Lite (25" x 12")

5210, 5212, 2010, 2012
3/4" Insulated Tempered - Clear, Frosted or Obscure
Outer frame matches door color. White inside frame.

5710, 5712, 710, 712, 610, 612
1/2" Insulated Tempered - Clear, Frosted or Obscure
Outer frame matches door color. White inside frame.

Small TL Lite (24" x 6")

5210, 5212, 2410L
3/4" Insulated Tempered - Clear or Frosted
Outer frame available in Black or White. White inside frame.

5710, 5712, 710, 712, 610, 612
1/2" Insulated Tempered - Clear or Frosted
Outer frame available in Black or White. White inside frame.

2410
1/8" Tempered - Clear or Frosted
Outer frame available in Black or White. White inside frame.

610, 680, 681, 682, 687, 690
1/2" Insulated - Clear/Clear, Clear/Frosted

2410, 2480, 2481, 2482
2580, 2581, 2582
1/8" Tempered - Clear

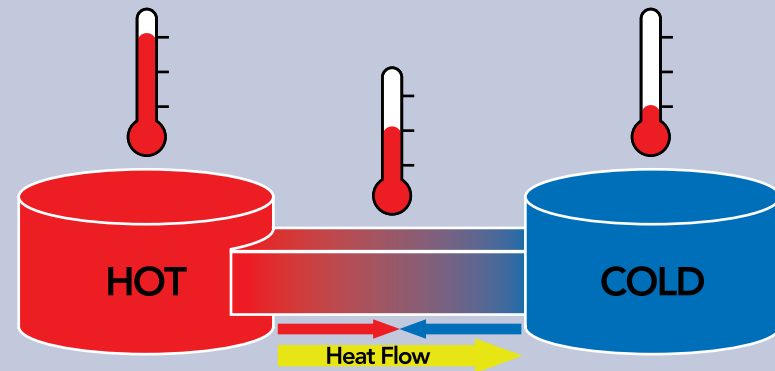

What is U-Factor?

The tested U-Factor is the measurement of heat (energy) transfer from warmer side to colder side of the garage door (in our case). Heat transfer is not desired because it means the loss of energy from conditioned spaces.

A lower U-Factor indicates less heat transfer and better thermal performance.

It is the preferred method for building codes thermal performance, and architects use U-Factors to calculate building envelope energy loads. U-Factor tests the whole, installed assembly. Energy Star Fenestration products and knowledgeable professionals recognize and use U-Factor.

Without insulation or thermal break to stop it, energy will transfer through the door.

Who is requesting this industry standard?

Door & Access Systems Manufacturers Association (DASMA) has setup a verification program to provide industry wide standardization of marketing the thermal performance of sectional garage doors. This program represents a shift in how sectional garage doors thermal performance is rated, from traditional R-Value to more accurate and relevant 3rd party tested door assembly U-Factor.

DASMA and the program participants agree to increased consistency, and transparency by sharing tested data, allowing customers to compare product quality facts. More detailed information about the program and U-Factors are available at www.dasma.com/thermal.

Why is a tested U-Factor better than a calculated R-Value?

Tested U-Factor

- U-Factor tests the whole installed assembly which includes section joint, lites, stile attachment, etc. - more relevant to thermal performance
- Third party tested and validated by the program administrator
- All manufacturers using the same testing methods ANSI/DASMA 105
- Tests measure the actual heat/energy transfer
- All manufacturer results will be a direct comparison to one another

Calculated R-Value

- Only one section is calculated and provides the insulating effect through the "center" of a door section only, not the entire door
- Independently calculated by each manufacturer - not validated
- No testing standard resulting in a wide interpretation of the calculation
- Calculates the resistance to thermal transfer

How does this benefit you?

This shift to tested U-Factor measurements sets a standard all manufacturers in the program adhere to. Tested products included in the program must be submitted to the program administrator. Only tested products in the program can list U-Factor data. This is the most reliable thermal performance indicator in the industry. Manufacturers in the program are stepping forward and formally having their products tested to prove quality.

Comparison of products between manufacturers has never been easier or more accurate. All tested products are required to be labeled with DASMA thermal performance verification displaying testing results. For accurate data and product comparison, choose products that have been tested through this program.

Establishing the standard testing procedure, and having a third party accredited lab perform and record the testing data provides consistency across the industry. Special guidelines have been put in place to properly market the U-Factor information as well. This removes any possible confusion from one manufacturer to another.

How can I tell if the product has been tested?

The use of DASMA thermal performance Badge, Label, or Icon will quickly identify products included in the program.

Residential Warranty & Product Gauge Information

American Tradition™ 9000 Series

- Insulated 24 Gauge Aluminum
- Insulated 26 Gauge Galvanized Steel & Overlay
- Lifetime Delamination and Rust-Through Warranty
- Base Section Finish Warranty
 - 35 Year for Trinar® Colors
 - 10 Year for Solid and Wood Grain Colors
- 6 Year Hardware Warranty
- 5 Year Overlay Delamination Warranty
 - Solid, Wood Grain and Trinar® Colors
- 3 Year Spring Warranty
- 1 Year All Other Components

Residential Aluminum 360 Series

- .050" Minimum Aluminum Tubular Extrusion
- 6 Year Hardware Warranty
- 5 Year Finish Warranty
- 3 Year Spring Warranty
- 1 Year All Other Components

5000 Series

- Insulated 24 Gauge Aluminum
- Lifetime Delamination Warranty
- 10 Year Finish Warranty
- 6 Year Hardware Warranty
- 3 Year Spring Warranty
- 1 Year All Other Components

2000, 700, 600 Series

- Insulated 26 Gauge Galvanized Steel
- Lifetime Delamination and Rust-Through Warranty
- Finish Warranty
 - 35 Year for Trinar® Colors
 - 12 Year for Plank Colors
 - 10 Year for Solid and Wood Grain Colors
- 6 Year Hardware Warranty
- 3 Year Spring Warranty
- 1 Year All Other Components

2400 Series

- 24 Gauge Galvanized Steel
- Lifetime Rust-Through Warranty
- 6 Year Hardware Warranty
- 3 Year Spring Warranty
- 1 Year All Other Components

2500 Series

- 24 Gauge Nominal Galvanized Steel
- Lifetime Rust-Through Warranty
- 3 Year Hardware Warranty
- 3 Year Spring Warranty
- 1 Year All Other Components

Wind Load

Haas garage doors are available in a wide range of design pressures for wind load requirements. Contact your local dealer for more information about wind load requirements in your area.

Are wind load garage doors only for hurricanes?

Wind load garage doors protect the entire home from high wind events. 90% of homes, where the garage door survived the storm, had no structural damage to the roof (IBHS 2025). From hurricanes to tornados, wind load garage doors are the gateway to a safe, resilient home.

Advanced Paint System

All Haas garage doors include a corrosion-resistant protective finish with a polyurethane primer and a durable polyester clear coat on the interior and exterior. Traditional and Plank wood grain colors include an additional ink layer. Haas Door's paint thickness is one of the highest in the industry.

Standard solid and traditional wood grain colors include a 10-year finish warranty, Plank wood grain colors have a 12-year finish warranty, and Trinar® solid colors come with a 35-year finish warranty.

Solid

Wood Grain

Plank

Weather Seal

Haas garage doors include a heavy vinyl bottom weather seal that seals out the elements and repels the most hostile weather conditions.

Insulated Models

2400 & 2500 Series

Accessories

Optional decorative hardware is available on most models.

Hinges (optional)

Handles
(optional, standard on 9000 series)

Black nylon, white nylon,
10 ball steel roller

Powder Coated Hardware Options

HaasCreate

The HaasCreate tool is more than a visualizer. It takes the guesswork out of buying a garage door. Upload a photo of your home or project, and try on different garage door colors, wood grains, and styles to find your perfect dream door.

There are many options to consider, but HaasCreate makes it easy by walking you through each option's advantages so you can select precisely what you want. From glass thicknesses to door thicknesses, HaasCreate helps every step of the way with the Guided Tour.

Do you have questions about how to open the garage door space? Want to know how the garage door can help with your energy efficiency or protect your home from high winds? Email an experienced dealer for answers to all your questions directly within HaasCreate. Send a digital file directly to a dealer near you for accurate quoting specific to your unique needs.

HaasCreate will help you find the perfect solution for your home or project and connect you with a knowledgeable installation expert in your area to ensure your home not only maximizes curb appeal but also goes beyond the visual.

Scan the QR code to go to HaasCreate and start designing your door.

HAASCREATE FEATURES

- Find your perfect garage door color and design
- Learn how a new garage door can increase the value of your home
- Request a quote at any time, day or night
- Share your new door ideas on social media
- Save multiple looks to your home or projects until you pick the final one
- Share a digital file directly with a professional installer
- Has a quickstart option for experienced users

Haas Door is Committed to Quality.

As a member of the Door and Access Systems Manufacturers Association (DASMA), Haas Door is committed to industry standards for quality and safety. In addition to these guidelines, Haas Door has developed its own quality assurance procedures.

Each raw material used in the manufacturing process is inspected daily for quality assurance. Steel used on the inside and outside skins is checked for accuracy in thickness and finish. The insulation material, a high density environmentally compliant polyurethane foam, is tested continuously on each production line to ensure that the correct density, blend of material, cure time and tested U-Factors are achieved.

Samples of manufactured doors are tested for quality and durability. Doors are cycled tens of thousands of times to test the performance and endurance of the sections, hinges, springs, cables, rollers, bottom seals, and track. Strength is measured using two separate tests. Individual sections are subjected to a dead load test, and complete doors are wind load tested. This ensures that Haas garage doors will meet wind load requirements for building codes across the country.

Haas continues to perform testing outside of the manufacturing facility, as both prototype and current doors are installed in various locations and monitored for durability. External labs are also used to test specific components to ensure quality standards.

Quality people and quality products are what make Haas Door the best garage door manufacturer in the industry. Open the door to endless possibilities!

Environmental Responsibility

Haas Door Company manufactures all garage doors in the U.S. and is committed to providing quality products that are safe for our customers and to the environment. Haas garage doors are made from steel that contains 80% recycled material. A plastic thermal break, made with recycled materials, separates each door section to eliminate metal-to-metal contact and the transfer of temperature. Haas also uses environmentally compliant polyurethane insulation, which results in some of the most energy-efficient doors on the market. Good for the environment and saves energy!

Haas Door has also implemented an ongoing improvement plan to gain efficiency and reduce waste, including a recycling program for scrap metal, cardboard and plastic. Many suppliers are regional, which minimizes fuel costs, and material packaging is reused or recycled whenever possible.
